

Dear Yuexing,

I am pleased to inform you that the Graduate Student Research Competition Committee approved your proposal for funding for your research project, **“POSER - An Effective Sitting Posture Modification Application”** in the requested amount of **\$1,000**. GSRC funds are not only intended to support students with their research expenses but also to provide students practice in crafting external grant proposals. With that in mind, the committee’s feedback has been attached for your review and consideration in the future.

You will receive an email shortly with further information regarding the dispersal of these funds. On behalf of the committee, we congratulate you on your award and wish you success with your project. Please send the committee a brief report regarding the outcome of your project when you have concluded the portion of your research that the Graduate Student Research Competition is funding (email to gsas@tufts.edu).

Sincerely,

A handwritten signature in black ink that reads "Karen A. Panetta".

Dr. Karen Panetta
